

ENERGY POLICY STATEMENT

SBS Transit is committed to minimising the environmental impact by optimising our energy usage and is dedicated to:

- a) Adopting greener/renewable energy utilisation, where possible;
- b) Incorporating energy-efficient designs and equipment into our premises and operations;
- c) Procuring new equipment based on assessment criteria that include energy consumption, efficiency, and life-cycle costs;
- d) Identifying consumption patterns to drive continual improvement and preventive maintenance; and
- e) Advocating prudent energy usage and conservation practices.

To achieve our energy conservation objectives, we will:

- a) Identify significant energy consumption areas and implement effective usage practices;
- b) Develop targets and plans to better manage energy consumption;
- c) Review energy consumption data and conservation progress quarterly;
- d) Comply with all relevant statutory, licencing and legal requirements, procedures, instructions; and
- e) Achieve national environmental certifications, such as BCA's Green Mark and the Singapore Environment Council's Eco-Office Certification.
