

WATER POLICY STATEMENT

SBS Transit is committed to minimising the environmental impact through our responsible water usage and is dedicated to:

- a) Utilising NEWater or recycled water in operations wherever available and viable;
- b) Analysing consumption patterns to identify opportunities for continual improvement and preventive maintenance; and
- c) Advocating prudent water usage and conservation practices.

To achieve our water conservation objectives, we will:

- a) Identify areas of significant water consumption and implement efficient usage practices;
- b) Install water-efficient taps and fittings with at least two ticks under Water Efficiency Labelling Scheme at all locations;
- c) Install private water meters, devices, and equipment where applicable to detect leaks;
- d) Develop targets and plans to reduce unnecessary water consumption;
- e) Review Water consumption data and track progress on water efficiency projects quarterly;
- f) Achieve PUB's Water Efficient Building Certification at all premises; and
- g) Comply with all relevant statutory, licencing requirements and legal requirements, procedures, instructions.
